

# INSPECTION BELT

In various parts of processing lines, there is a need to inspect the product for quality reasons or for final product reasons. The Inspection Belt can be modified and adopted to each line and product requirement. The stainless-steel

framework has an eyelink belt as standard. The speed of the belt is adjustable. As optional the inspection belt can be supplied with other belt types or working platforms etc.

## INSPECTION BELT ADVANTAGES

Stainless-steel eyelink  
belt as standard

Adjustable Belt Speed

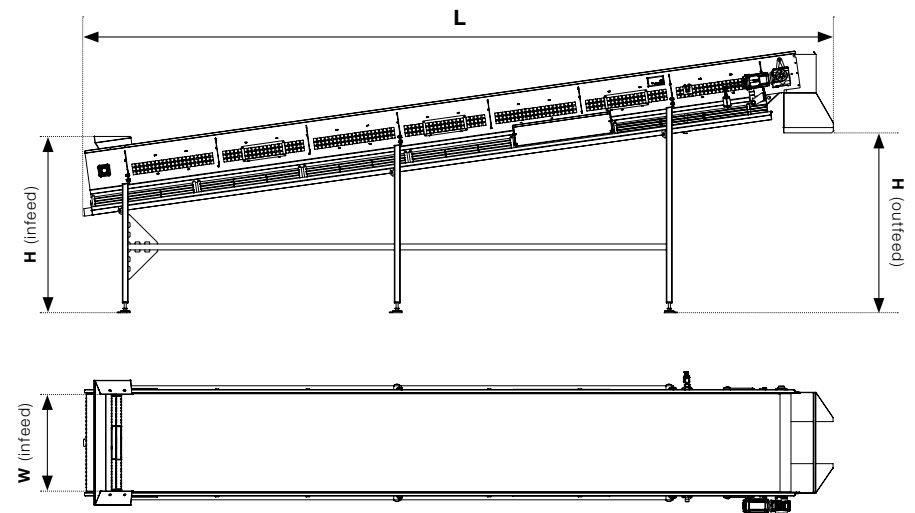

**SIDE**

**FRONT**

INSPECTION BELT	L (mm)	W INFEED (mm)	H INFEED (mm)	INSTALLED POWER
<b>IBS1020</b>	2780	800	As Desired	0,75 kw
<b>IBS1230</b>	3650	1200	As Desired	0,75 kw
<b>IBS1030</b>	3640	950	As Desired	0,75 kw

**STAINLESS-STEEL EYELINK  
BELT AS STANDARD**

**ADJUSTABLE  
BELT SPEED**
